(54) Title: PROPULSION SYSTEM FOR SCUBA DIVER

(57) Abstract: Electric Propulsion system supported by a special usable
slinging from scuba divers, deep-sea divers or simple swimmers, advan-
tageously fed by a sophisticated system of rechargeable batteries, inserted
inside several united watertight containers between them. The innovative
structure, allow to all specialized operators to move forward underwater
even if the immersions will be made in depth and prolonged for long time
periods. Another very important characteristic of the system they are the
reduced ones it blocks, what they will allow to move and be operated in
complete freedom and any condition.
